

## **American Ranch Wastewater Evaluation *Engineering***

Fann Environmental conducted an evaluation of this wastewater system, which included analysis of all system components, review of operation financials and discussion with District regarding the findings. The analysis also included research of the original design assumptions/parameters, developed an approach with recommendations of normal operational procedures and changes needed for the facility with cost estimates of changes for both current flow and projected flows. Fann Environmental provided verbal and written reports to the District and a detailed presentation of findings recommendations and projected costs to the Board of Directors.

**Owner:** American Ranch Sanitary District

**Final Construction Cost:** \$4,800

**Project Completion Date:** May 2009

**Fann Environmental Key Personnel:**

Mike Young - Project Manager
