

## **Antelope Point Water & Wastewater** *Operation & Maintenance*

Fann Environmental provides a Grade 4 Certified Wastewater Operation and Collection and Grade 3 Water Treatment and Distribution operator to operate and maintain both the water and wastewater systems for this heavily used recreational facility. The operator collects monthly samples for submission to the laboratory for testing and then submits the final reports to the Navajo EPA. The operator maintains both systems making repairs and upgrades as necessary. Both systems are used extensively during the tourist seasons when there is heavy boat traffic.

**Owner:** Antelope Point Holdings, LLC

**Project Completion Date:** Ongoing

**Fann Environmental Key Personnel:**

Mike Young - Project Manager
