

Del Rio Lift Station
Design Build

Fann Environmental provided all labor and materials needed to upgrade the well site located at the Del Rio Springs Ranch. This included obtaining all required permitting from ADEQ and ADWR, necessary engineering, removal of existing surface casing, installation of new casing and sanitary seal, installation of a small submersible pump, a pressure tank system and coordination with APS for the power at the well site.

Fann Environmental provided all the labor, materials and permitting to provide a turn-key operation which included a 2500-gallon sewer vault. All of which was necessary to provide water and sewer facilities to the construction trailer located on site.

Owner: Bond Ranch @ Del Rio Springs, LLC

Final Construction Cost: \$29,610

Project Completion Date: April 2006

Fann Environmental Key Personnel:

Jeff Sawyer - Project Manager

Robert Upton - Design Engineer
