

Flagstaff Ranch Arsenic Treatment *General Contractor*

Fann Environmental installed and mounted customer supplied equipment including an AdEdge arsenic skid filter assembly, bag filter, backwash tank and pump, as well as chemical feed equipment. Fann Environmental provided electrical and field piping as per ADEQ approved drawings provided by the client. Fann Environmental provided the customer with as-built drawings at the completion of the project. Fann Environmental also provided media and completed the change out service in June of 2009.

Owner: Flagstaff Ranch Water Co.

Final Construction Cost: \$29,132

Project Completion Date: August 2006

Fann Environmental Key Personnel:

Mike Young - Project Manager
