

Prescott Valley Wastewater Treatment Facility Expansion *General Contractor / Construction Manager at Risk*

FE was a subcontractor to Fann Contracting, Inc. to perform day-to-day construction supervisions, constructability reviews, value engineering, and QA/QC. This project consisted of a 1.5 million gallon a day expansion/upgrade to the existing 2.25 million gallon a day plant. FE oversaw the installation of new anoxic basins, clarifiers, underground piping, a solids handling building, two other process buildings and electrical controls/SCADA upgrades. Through the *Total Team Approach*, FE provided value-engineering recommendations for the project in excess of \$600,000. FE also documented all as-built conditions for the owner.
