

Sedona WWTP Piping and Valve Diagram As-Builts *Engineering*

Years of upgrades and changes left the City of Sedona without accurate drawings (blueprints) of the Wastewater Treatment Plant active process piping. FE reviewed all of the plant's design and construction drawings, surveyed the plant structures and compiled all piping and facilities into one drawing. FE was able to determine which lines were active or abandoned and depicted the active pipelines. This project also included the development of a valve exercise program for the plant operators.

Owner: City of Sedona
Role: Engineer
Engineer: Stanley Consultants
Contract Amount: \$33,372
Final Contract Amount: \$30,000
Project Start Date: April 2009
Project Completion Date: June 2009

Fann Environmental Key Personnel:
Robert Upton - Civil Engineer
