

## Walnut Creek System Evaluation

Fann Environmental provided a certified operator to collect water samples on a monthly basis and submit them to the laboratory for testing. Once testing results were obtained they were then sent to the owner for record keeping. If tests results proved negative, Fann Environmental's certified operator would then arrange to collect new samples and submit them to the lab.

**Owner:** Prescott College

**Final Construction Cost:** \$150 per month

**Project Completion Date:** Feb 2007-Feb 2011

**Fann Environmental Key Personnel:**

Mike Young - Project Manager
